

FLY CASTING FAULTS AND FIXES

With Mel Krieger

This month's meeting will be a combination of instruction and movie night for a detailed look at fly casting problems and their solutions.

Fly Casting Faults and Fixes is a reference work of fly casting faults and their solutions for instructors and fly fishers who take their casting seriously. Beginning with the basic mechanics of fly casting, Mel demonstrates and analyzes open and tailing loop

shapes, good timing, roll cast, curve casts, power application, creeping, push vs. pull through, last cast syndrome, the double haul, Spey casts and many other common casts.

Mel Krieger (1928-2008) was known throughout the world as the leading instructor on fly casting. Mel's casting workshops, clinics, numerous books & videos have displayed his love of casting.

Meeting starts a 6 PM See you there!!!
